PROFILE

Final-year IT undergraduate at SLIIT with hands-on experience spanning the full software development lifecycle — from designing and building full-stack applications to deploying and monitoring cloud infrastructure. Proficient with AWS, Azure, and Docker, with practical exposure to CI/CD pipelines, relational and NoSQL databases, and test-driven development. Comfortable contributing across engineering, operations, and quality assurance functions, and eager to bring a strong problem-solving mindset to a collaborative technical team.

TECHNICAL SKILLS

DevOps & Cloud-

AWS (EC2), Azure, Docker, Linux, CI/CD (GitHub Actions), Shell Scripting

Programming & Frameworks-

Java, Node.js, React, Kotlin, PHP, HTML, CSS, Python

Databases-

MySQL, MongoDB, SQLite

QA & Testing-

Manual Testing, Test Case Design, API Testing (Postman), TestNG, Selenium ,SQL Testing

EDUCATION

- BSc (Hons) Information Technology Sri Lanka Institute of Information Technology (SLIIT) — 2022-present
- G.C.E. Advanced Level — Engineering Technology Peradeniya Central College — 2019
- G.C.E. Ordinary Level Vidyarthi College, Kandy — 2016

ACADEMIC PROJECTS

- **Farm Management System (MERN Stack):** Built a full-stack web application to manage farm operations including crop tracking, resource allocation, and analytics dashboards. Designed RESTful APIs with Node.js and Express, implemented a responsive React frontend, and managed data with MongoDB.
- **Stock Management System (MERN + AI):** Collaborated in a team to build an AI-driven supplier selection system integrating the OpenAI API to recommend optimal suppliers based on price, delivery time, and reliability. Deployed on AWS EC2 with Docker for scalable hosting and configured a CI/CD pipeline using GitHub Actions for automated builds. Performed API testing using Postman to validate backend endpoints.
- **Spare Part Inventory Management (Java, MySQL):** Collaborated in a team to develop a full-stack inventory system for tracking spare parts and managing supplier information. Implemented efficient database queries to improve backend performance and designed an intuitive frontend interface for seamless user interaction.
- **Task Manager Android App (Kotlin, SQLite):** Independently developed an offline-capable Android application for task tracking and reminders, utilising SQLite for local data persistence and Kotlin for native mobile development.
- **Salon Booking System (PHP, MySQL):** Collaborated in a team to develop a full-stack appointment scheduling system featuring a customer-facing booking interface and an admin panel for managing appointments. Designed SQL test cases and performed functional testing to validate booking workflows and ensure system reliability.

EXTRA CURRICULAR ACTIVITIES

- Member, Rotaract Club of SLIIT
- Active participant in coding & IT project
