

SHAMOD FERNANDO

Fourth-Year Information Technology undergraduate at the Sri Lanka Institute of Information Technology (SLIIT) with hands-on experience in Software Engineering, Full-Stack Web Development, UI/UX Design, and Database Management. Skilled in the MERN Stack, Java, Spring Boot, REST API development, and modern web technologies. Experienced in designing responsive user interfaces, developing scalable web applications, and implementing database solutions through academic and personal projects. Possess strong problem-solving, teamwork, and technical troubleshooting abilities. Passionate about learning emerging technologies and seeking opportunities in Software Engineering, Full-Stack Development, UI/UX Design, or IT Support to further enhance technical and professional skills.

EXPERIENCE

Academic Projects & University Coursework

Sri Lanka Institute of Information Technology (SLIIT)

- Developed multiple web-based applications using Java, Spring Boot, React.js, Node.js, and MongoDB.
- Participated in team-based software development projects following Software Development Life Cycle (SDLC) practices.
- Designed and implemented database systems using MySQL and MongoDB
- Created UI/UX prototypes and wireframes using Figma for Human Computer Interaction projects.
- Applied software testing, debugging, and documentation techniques throughout project development.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) Information Technology 2023 – Present

St. Joseph's College - Colombo 10 , Negombo Branch

GCE Advanced Level (Maths Stream) - 1C, 2S

GCE Ordinary Level - 2A,3B,4C

PROJECTS

Juice Bar Inventory Management System

Technologies: MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Developed an inventory management module for a Juice Bar Management System.
- Implemented CRUD operations for inventory stock management.
- Developed expiry date tracking and low-stock monitoring features.
- Created notification systems for expiring and expired products.
- Integrated frontend and backend services using REST APIs.

GitHub : <https://github.com/Shamod2004/Juice-bar-inventory-system.git>

Smart Campus Management System

Technologies: Java, Spring Boot, React.js, MongoDB

- Developed a smart campus management system using Spring Boot and modern web technologies.
- Implemented backend services, REST APIs, and database integration.
- Participated in collaborative software development within a team environment.
- Applied MVC architecture and software engineering best practices.

GitHub: <https://github.com/Shamod2004/it3030-paf-2026-smart-campus-group03.git>

Student Transport Management System

Technologies: MERN Stack, Java

- Developed a transport management and seat booking system for students.
- Implemented seat reservation and booking management functionalities.
- Managed transport schedules and student booking records.
- Participated in project planning, system design, testing, and documentation.

GitHub: <https://github.com/Shamod2004/student-transport-system.git>

Singlish to Sinhala Transliteration Test Automation System

Technologies: Python, Playwright, OpenPyXL, Excel Test Automation, Software Testing

- Developed an automated testing solution for a Singlish-to-Sinhala transliteration web application.
- Implemented end-to-end browser automation using Playwright to execute and validate test cases.
- Automated the execution of 50 negative test scenarios covering multiple input categories.
- Captured API responses and validated actual outputs against expected results.
- Generated automated PASS/FAIL test reports and updated results directly in Excel files using OpenPyXL.

GitHub: <https://github.com/Shamod2004/IT23284302-Assignment1.git>

Online Marketplace UI/UX Prototype

Technologies: Figma, UI/UX Design, Wireframing, Prototyping

- Designed a high-fidelity online marketplace prototype using Figma.
- Created user-centered interfaces following Human Computer Interaction (HCI) principles.
- Developed wireframes, user flows, and interactive prototypes.
- Designed product browsing, search, category navigation, and advertisement posting workflows.
- Applied responsive design and usability principles to enhance user experience.

Figma : <https://www.figma.com/design/wj7ye4wQPGIkGV7851Prih/HCI?node-id=0-1&t=13Rb3BCHrwcLWdQZ-1>

SKILLS

- Proficient in Java and JavaScript, with experience in full-stack web development using HTML5, CSS3, and REST APIs.
- Have hands-on experience in React.js, Node.js, Express.js, and Spring Boot for building dynamic frontend and backend applications.
- Skilled in working with MongoDB, MySQL, and PostgreSQL, including database design, SQL queries, and CRUD operations.
- Proficient in UI/UX design using Figma and Canva, with a focus on creating responsive and user-friendly interfaces.
- Experience in IT support, including system troubleshooting, software installation, hardware basics, and basic networking.
- Experienced in using development tools such as Git, GitHub, Postman, MongoDB Compass, Visual Studio Code, Eclipse, and Trello.
- Soft skills including problem-solving, teamwork, communication, adaptability, and quick learning ability.

CERTIFICATE

Full Stack MERN Development

MongoDB Certification - MongoDB Java Developer Path
