ABOUT ME

Passionate IT professional with a strong combination of technical and business acumen in data analysis and product strategy. Proficient in SQL, Python, Power BI, and data visualization tools, adept at transforming complex data into actionable insights that drive business decisions. Experienced in managing multiple high-priority data projects in fast-paced environments, consistently meeting tight deadlines while maintaining data accuracy and quality. Eager to leverage data-driven solutions to optimize product performance and contribute to innovative teams in dynamic environments.

EDUCATION

- Sri Lanka Institute of Information Technology** Malabe, Sri Lanka
• *BSc (Hons) in Information Technology* May 2023 - June 2027
- GCE Advanced Level Examination** Sri Lanka
• *Technology Stream - Passed All Subjects in One Sitting* 2021
- GCE Ordinary Level Examination** Sri Lanka
• *Passed all subjects in one sitting* 2018

SKILLS SUMMARY

- **Languages:** Python, R, JavaScript, SQL, Java
- **Frameworks:** React.js, Node.js, Scikit-learn, TensorFlow, Keras
- **Tools:** Git, GitHub, Power BI, MySQL, Pandas, NumPy
- **Technologies:** AWS, Azure, Docker, NLP (SpaCy), CI/CD Integration
- **Soft Skills:** Leadership, Communication, Time Management

PROJECTS

- **Portfolio Website:** Created a personal portfolio website to showcase projects, skills, and achievements with an intuitive design and user-friendly interface, allowing visitors to easily navigate through my work and contact details.
Tech: JavaScript, Tailwind CSS
- **Hospital Management System:** Built a full-stack Hospital Management System using the MERN stack to digitize and streamline hospital operations such as patient management, appointment booking, health package browsing, and blood bank services.
Tech: React.js, Node.js, RESTful APIs
- **University Management Mystem:** UniFlowX is a smart campus operations platform that streamlines resource booking, maintenance management, and incident handling through a unified role-based web system.
Tech: React.js, SpringBoot, MySQL, Java, NeonDB, Maven, Google Authenticatio
- **Pizza Sales Analysis:** Developed a Power BI dashboard to track and analyze key pizza sales metrics, including sales trends, top-performing categories, and inventory management. Provided insights into customer preferences.
Tech: Power BI
- **Spam Detection:** Developed a machine learning-based spam detection system to classify messages as spam or not spam using natural language processing techniques. Improved classification accuracy using feature engineering and ML models.
Tech: Python, Pandas, NumPy, Scikit-learn
- **Movie Recommendation System:** Built a collaborative filtering-based recommendation system to suggest personalized movies based on user preferences.
Tech: Machine Learning (NumPy, Pandas, Scikit-learn)
- **AI-Powered Medical Insight Platform:** Developed an AI-driven healthcare intelligence system to analyze medical data and provide intelligent insights for diagnosis support and decision-making. Implemented secure backend services, scalable APIs, and an interactive user interface for seamless access to medical insights.
Tech: React.js, Flask, Python, Machine Learning, OpenAI API, LangChain, Pinecone, AWS

CERTIFICATES

- AI/ML Engineer Stage 1 (SLIIT)
- Front-End Web Development - CODL (Moratuwa)
- Power BI Data Modeling Basics (Simplilearn)
- Web Design for Beginners - CODL (Moratuwa)
- Python for Beginners (University of Moratuwa)
- Diploma in Artificial Intelligence (UniAthena)
- Build a Backend REST API (Udemy)
- Azure AI Fundamentals (Microsoft)
- Java Intermediate - SoloLearn
