ANUDI INDUWARI

Bandaragama, Sri Lanka | 071 586 7464 | anudiinduwari02@gmail.com | github.com/anudiinduwari

PROFESSIONAL SUMMARY

Motivated final-year Information Technology undergraduate at the Sri Lanka Institute of Information Technology (SLIIT), with hands-on experience designing and building full-stack web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js), Spring Boot, and Java. Completed academic and personal projects spanning inventory management, event booking, incident ticketing, and appointment scheduling systems, consistently translating requirements into scalable, user-focused solutions. Seeking a Software Engineering internship to apply full-stack development skills and contribute to real-world engineering projects.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT) 2023 – Present

BSc (Hons) in Information Technology - Specializing in Information Technology 2021 (2022)

G.C.E. Advanced Level

Science Stream (Mathematics)

TECHNICAL SKILLS

Programming & Scripting: Python, Java, JavaScript, SQL
Frontend Development: React.js, HTML, CSS
Backend Development: Node.js, Express.js, Spring Boot, PHP
Databases: MySQL, MongoDB
Version Control: Git, GitHub
UI/UX Design: Figma

PROJECTS

Online Vehicle Service Management System

Full-Stack Web Application | MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Engineered an inventory management module with automated low-stock alerts and FIFO stock handling to streamline warehouse tracking
- Built automated supplier notifications integrated with inventory analytics to support data-driven restocking decisions
- Generated dynamic PDF reports for stock monitoring and net-worth calculation, improving accuracy of financial reporting
- Designed a role-based notification system delivering targeted alerts across different user roles

Enterprise Event Management System

Full-Stack Web Application | MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Engineered an event booking and reservation platform with real-time seat availability tracking and doublebooking prevention
- Integrated QR-code-based attendee check-in, automating attendance recording for university-wide events

- Implemented digital certificate generation and streamlined booking confirmation workflows using unique booking IDs and automated email notifications

Smart Campus Operations Hub

Full-Stack Web Application | Spring Boot, React.js, MongoDB

- Built a maintenance and incident ticketing system with end-to-end ticket lifecycle tracking and status management
- Configured comment management, file-attachment support, and role-based access control to secure platform workflows
- Developed analytics dashboards and automated notification workflows to improve operational visibility

Online Tour Guide Website

Web Application | Java Servlets, JSP, MySQL

- Designed and implemented a tour booking system with structured data validation
- Developed tour management features with robust error handling to ensure data integrity
- Added complaint-handling and notification functionality to strengthen customer service workflows

Online Vaccination Portal

Web Application | PHP, MySQL

- Built a vaccination appointment booking system with input validation to ensure data accuracy
- Implemented user registration and appointment scheduling functionality

SOFT SKILLS

Teamwork & Collaboration, Communication, Problem Solving & Analytical Thinking, Time Management, Creativity & Innovation
