• Willingness to learn

SUMMARY

A dedicated IT undergraduate with solid programming fundamentals, hands-on experience in web development, and database management knowledge. Keen to turn academic learning into practical results. Fast learner of new tools, collaborative, detail-driven, and analytically minded. Focused on delivering usable, efficient solutions and adding value to team-driven tech environments.

ACADEMIC PROJECTS

StepUp - Collaborative Academic Growth Ecosystem | Team Project

- Developed using the MERN stack (MongoDB, Express.js, React, Node.js) with React Context API for state management
- Implemented Content Lifecycle Management features including material uploads, version tracking, and verification workflows
- Built Collaborative Classroom system with role-based access, session scheduling, and real-time notifications
- **GitHub** : <https://github.com/adrianAbeyrathne/StepUp>

Smart Campus Operations Hub - Campus Management System | Team Project

Full-stack web application using Spring Boot (Java 21), React 18, and MongoDB for facility booking, maintenance tracking, and notifications.

- Built REST API for resource management, booking workflow with conflict detection, and incident ticketing with image attachments
- Developed React frontend with OAuth 2.0 authentication, JWT tokens, and role-based access control
- Implemented real-time notification system and automated CI/CD pipeline via GitHub Actions
- **GitHub** : <https://github.com/adrianAbeyrathne/it3030-paf-2026-smart-campus-group71>

WORK EXPERIENCE

Internship Support Role

Hatton National Bank PLC
Feb. 2023 - Nov. 2023

- Assisted the Sustainable Business Unit with day-to-day operations and tasks.
- Collaborated with team members on various sustainability initiatives.
- Gained valuable insights into banking operations and customer service.
